Education

bachlor degree in software engineering   Jun 2022 - Present

wollo university, kombolcha

- Learned to create, test, and maintain web applications, ensuring cross-platform functionality and responsiveness for optimal user experience.
- Studied software architecture and design patterns to enhance code maintainability and scalability in complex application environments.
- Gained expertise in web development frameworks such as React and Node.js, enabling the creation of dynamic and interactive applications.
- Mastered principles of object-oriented programming and software design, applying concepts in creating robust software solutions.
- Explored version control systems, particularly Git, to manage code changes effectively and collaborate seamlessly with team members.
- Developed skills in RESTful API design and implementation, allowing for seamless integration of front-end and back-end services in applications.

Achievements

- Participated in hackathons and coding competitions, achieving top placements by developing innovative web solutions under tight deadlines.
- Built and deployed RESTful APIs, enabling smooth communication between front-end and back-end components, which reduced loading times by 20%.
- Achieved high commendations for my project work during my software engineering degree, demonstrating a strong commitment to code quality and design principles.
